NCAA FOOTBALL 06 PLAYBOOK CHARTS

About

For years I have been trying to find a way to make offensive team and generic playbooks useful for gamers in NCAA Football 06. As many know, we can create our own playbooks by combining any nine formations the game offers. I normally create my own playbook, but there are times when you need new and fresh schematic ideas for your next dynasty. I finally have the solution!

This book contains playbook charts for all 125 playbooks in the game. Each chart uses the same format. The name of the playbook and offense type are listed at the top. All nine formations for each playbook are listed vertically. Various play types are listed with column headers. Within the chart are plays I think are worth using in the game.

All of this results in giving you playbook charts you can use as a base to run complete offenses! Think of these as play call sheets like coaches use when calling a game.

Play Types

All plays listed are ones I think work well enough to use in the game. I sorted every play by six categories: three for running and three for passing.

- **Run Plays**
 - **HB:** run plays for the HB.
 - **Others:** run plays for other players like your QB, FB, and WRs.
 - **Option:** option-based run plays.
- **Pass Plays**
 - **Left:** pass plays that work best on the left hash.
 - **Both/Middle:** pass plays that can work on either hash or in the middle of the field.
 - **Right:** pass plays that work best on the right hash.

You can flip plays so they can work on the opposite hash, but these charts are set up where you don't have to do that. [Please read my Quarterback Guide](#) if you don't understand why pass plays work in certain areas of the field.

I also added the Goal Line formation to every chart and which plays I like from it as well. And just to clarify, any team that uses the same formation will have the same 18 plays so there are no special hidden plays anywhere.

Offense Types

There are 119 team playbooks and 6 generic playbooks in the game. I categorized all of them in alphabetical order by the offense types the game uses. These types attract certain prospects and force you to have certain minimum roster requirements. [I suggest you watch this video](#) for more info about that.

- **Balanced:** this is a mix of various formations thus you can run a little bit of everything from these playbooks. You can also use many of these are pro style playbooks.
- **Flexbone & Option Run:** these playbooks are ideal for running heavy option with extra use of Flexbone formations.
- **Spread:** these playbooks favor more modern offenses with heavy use of 3-5 formations.
- **West Coast:** although these playbooks may look similar to some Balanced playbooks, these tend to have more under center formations which look similar to the original West Coast offense.

Don't be surprised to see some playbooks in one category look like one from another category. However, at least you have categories to start from, but don't hesitate to look in the other sections to find a similar idea.

As I mentioned earlier, there are six generic playbooks I put these in one of the sections above.

- **Balanced Pass:** Spread
- **Balanced Run:** Balanced
- **Option Run:** Flexbone/Option Run
- **Pass Heavy:** Spread
- **Run N Gun:** Balanced
- **West Coast:** West Coast

Playbook Chart Template

Use the link below to access a folder containing an Excel file that contains all formation info and the plays I like in each along with a blank template to copy and paste to. I also added a blank PDF in case you want to use that to print off and write in plays you like.

[Playbook Chart Template](#)

Conclusion

I hope this book provides you with endless ideas and a starting point for new schemes. I suggest you print whichever chart you need at the time, mark it up, highlight, etc. Make these your own. Have fun!
